Restriction

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1 and 2, drawn to a method for producing therapeutic compounds, classified in class 552, subclass 502+.
- II. Claims 3-7, drawn to methods of inducing apoptosis in cancerous tissues, classified in class 514, subclass 174, 182.

The inventions are distinct, each from the other, for the following reasons:

Inventions II and I are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the disclosed compounds of claims 3-7 may be used to achieve other therapeutic endpoints other than inducing apoptosis.

Further, these inventions have acquired a separate status in the art as shown by their different classification, their recognized, divergent subject matter and different search requirements. Restriction for examination purposes, as indicated, is proper.

Applicants are advised that to be complete, the reply to this requirement must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
